

Bedding Policy - 2025

Effective February 1, 2025

WTA/MLR – On Track Bedding Policy – Change Due to Manure Removal Concerns

To all trainers or owners applying for stalls on the ground at the Meadows, there are two forms of approved bedding:

1. Baled Straw
2. Bagged Shredded Straw

No other forms of bedding are approved unless management gives a written approval. Any trainers or owners found to be using any other forms of bedding could be subject to a penalty which could result in loss of stalls.

We realize that this policy specifically removes pelletized straw as a bedding option so we are setting a start date of February 1, 2025, for any who currently may use this type of bedding.

- Please keep the area around the manure wagon or containers clean
- Please pick up piles of straw or chaff that maintenance or personnel rake up
- Please do no blow spent bedding or hay to the curb or drainage ditches.

I the undersigned understand and will adhere to this policy
